And passionate about learning new technologies Expert in creating responsive web applications and have knowledge of backend technologies like Node js.

WORK EXPERIENCE

MEAN Stack Developer (Contract) May 2023 to Aug 2023

The Aquarious Technology

- CZ Masters is an Angular-based responsive web application, where the admin has access all over the project, he can accept the request of a user who has requested the new property.
- Admin can manage the properties, and issues regarding the owned properties. The user can check the properties listed by the admin and also can buy a new property and register the complaints if he has one.
- The Admin can manage the notifications and the social media handles. And can communicate with staff and vendors for inquiries and issues with the property.

Front End :- Angular 14 **Backend** :- Node JS **Database** :- MongoDB

Front End Developer

Fintech Global Center Nov 2022 to Mar 2023

- NoCode app is an Angular-based responsive web app that is basically created to reduce the workload of creating applications through coding.
- Also, in this project, you can create your own style application according to your needs and if you want to buy domains then you have to pay for that. Also, you can create n number of applications.
- There are some components like Post, Newsletter, Email, SMS, and Admin going through all these components you can create your application.

Front End :- Angular 13 **Backend** :- Node JS **Database** :- MongoDB

Software Enginner

Intellect Design Arena July 2021 to Sept 2022

- Worked as a front-end developer in an iGTB project, for Transaction Limit Management product for Barkleys and Lloyds Banking Group.
- The Product is used to give the decision of Pay or No Pay whether the transaction can be done or not depending on the Limits and Balances in the Account.
- My Role:- Created a structure that shows the hierarchy of Customer Group, Customer, Account Group, and Account, which represents the tree structure of limits and balances of children and parents.

Front End :- Angular 8 **Backend** :- Spring Boot **Database** :- Postgress
