-  3207, Ganapati Road, Ashta, Maharashtra

SKILLS

- HTML, SCSS, Javascript
- Angular 13
- React JS
- Node JS, Express JS
- MySQL , MongoDB
- Git, Github , Gitlab
- Core Java

EDUCATION

B.Tech (Information Technology) 62%

DKTE Textile and Engineering Institute,
Ichalkaranji
2016-2021

H.S.C. (Science) 60%

Vidyamandir Jr College, Islampur
2014-2016

S.S.C. 80%

Mahatma Gandhi Vidyalaya, Ashta
2008-2014

ACHIEVEMENTS

- Red Hat Linux Administrator Nov 2021 - Dec 2021
- Smart India hackathon Feb 2020 - Mar 2020

LANGUAGES

- English
- Hindi
- Marath

PROFILE

Immediate joiner. Looking for a better opportunity as an Angular or MEAN STACK developer With 2 years of relevant Industrial experience in Angular Technology in the IT Industry. Completed B.Tech in Information Technology (6.2 CGPA). And adept at developing and designing responsive web pages with knowledge of front-end technologies like Angular and React Js and backend technologies like Node JS Express Js and MongoDB database.

WORK EXPERIENCE

MEAN Stack Developer (Contract)

May 2023 to Aug 2023

The Aquarious Technology

- Created Angular-based responsive web application where admin and user have login and sign-up credentials.
- Admin can manage the property listed and the user can buy these properties with the facilities listed by the admin, and Admin can go through the complaints registered by the user.
- Worked on performance improvement and speed optimization and boosted network, and system availability through preventive maintenance & upgrades.
- Worked with back-end developers to integrate with APIs to manipulate with asynchronous data and used GitHub to maintain the versions of code.

Front End :- Angular 14 Backend :- Node Js Database :- MongoDB

Front End Developer

Fintech Global Center

Nov 2022 to Mar 2023

- Developed NoCode app projects which is an Angular-based responsive web app that is basically created to reduce the workload of creating applications with or without buying domains through programming.
- Designed reusable and reliable code for use within distributed cloud environments and to maintain the versions of code on gitlab.
- Organized this project in such a way that you can create your own style application according to your needs to create n number of applications.

Front End :- Angular 13 Backend :- Node Js Database :- MongoDB

Software Engineer

Intellect Design Arena

July 2021 to Sept 2022

- The Product is designed to be used to give the decision of Pay or No Pay whether the transaction can be done or not depending on the Limits and Balances in the account.
- Revised, debugged, and updated old code bases to modern development standards, reducing operating costs and improving functionality.
- My Role:- Created a tree structure that shows the hierarchy of Customer Group, Customer, Account Group, and Account, which represents the tree structure of limits and balances of children and parents

Front End :- Angular 8 Backend :- Spring Boot Database :- PostgreSQL
